Session II: Issues and Examples of Rural-Urban Linkages, Migration and Integration IPRCC-ADB's International Policy Workshop on Urban Poverty and Inclusive Cities-Implications for Policy in the People's Republic of China

June 25, 2013, Suqian, Jiangsu Province

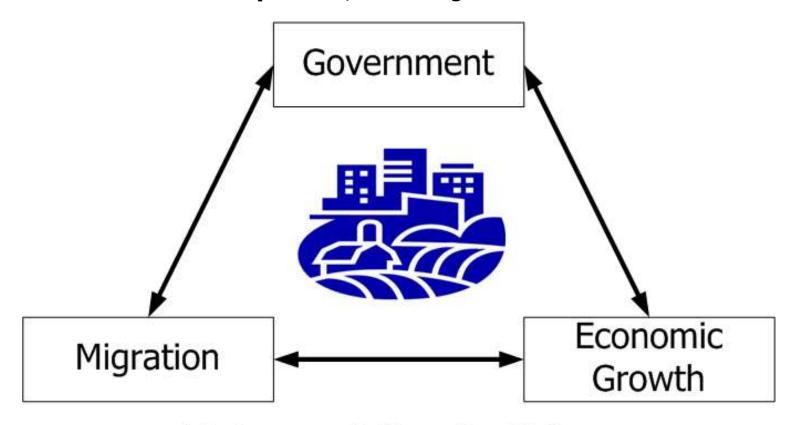

Outlines

- Structure of Rural-Urban in Thailand
- Rural-Urban Migration Situation in Thailand
- Rural-Urban Poverty in Thailand
- The Current Government Policy on Poverty Alleviation
- Poverty Alleviation Through the Social Assistances
- Suggested Policy to reduce Rural-urban Poverty

Linkage of Rural-Urban in Thailand

• By using the topic from "Rural-Urban Linkage; International Institute for Environment and Development", the linkage can be divided into 3 modules

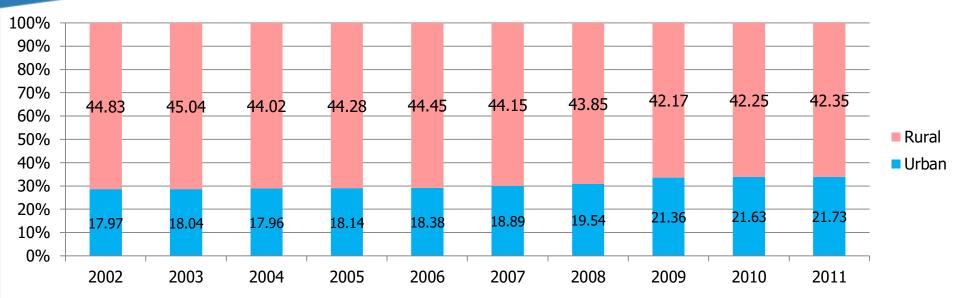

Linkage of Rural - Urban

Source: http://www.iied.org/rural-urban-linkages

Structure of Rural-Urban in Thailand

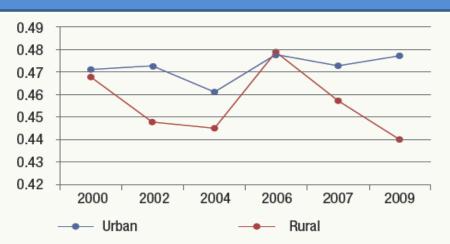

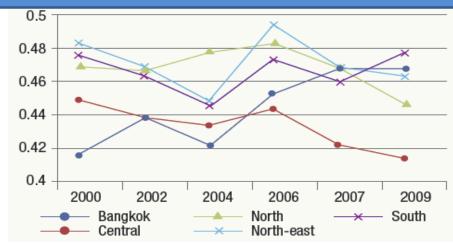

- Percentage of urban living tend to be slightly increased in Thailand. This is because
 - Land and availability of labor market cannot absorb number of people in rural area.
 - The attitude of the Gen-Y who likely to turn back agricultural sector which concern as the main sector in rural area.
 - Agricultural sector tend not to generate high income for family members

Structure of Household Income

Average Monthly Income and Expenditure Per Household

Rural-Urban Migration Situation in Thailand

- To search for better opportunity is the main reason for migration between rural and urban. Problem between rural-urban in Thailand tend to be the same as other developing countries around the world
- Bangkok remain the main destination for migrants, and the city tend to be a good example for urban-rural migration
 - During 1975 1980, there was the massive migration to Bangkok, since Thailand economic policy became "Exported-oriented Industrialize". Number of immigration remained high until 1997 when the country faced an Asian Financial Crisis.
 - After the Asian Financial Crisis, number of immigration tended to be decreased due to the closure of business. However, the study found that those who move out seem not go back to rural area, but they move to Bangkok Metropolitan Region (BMR) and becoming a latent population.
- National policy in regional development, and Foreign Direct Investment (FDI) attract people to move to near by province (Bangkok Outer Ring)

Rural-Urban Migration Situation in Thailand

Because of the expansion in urban area, Bangkok and its bordering city tend to expand to the surrounding areas;

- 1. BMR Sub-region:
 - financial activity
 - Education
 - business center
- 2. Central Sub-region:
 - Agricultural Industry
 - Manufacturing Industry
 - The center of construction material
- 3. East Sub-region
 - Heavy Industry
 - Port
 - Potential in R&D, Data center, HRD
- 4. West Sub-region:
 - Eco-tourism and recreation
 - Hi-tech and software industry

Rural-Urban Migration Push and Pull Factor

1. Income Differences

	Population Pr	oportion (%)	Income (Baht/person/month)					
	Urban	Rural	Urban	Rural				
Agricultural	4.9	30.3	5,214	4,082				
- Land owner	3.9	25.1	5,186	3,968				
- Land rent	1.0	5.2	5,317	4,638				
Forestry, Fishery and other agricultural services	0.8	2.5	3,610	2,510				
Non-agricutural business	28.8	14.9	9,628	5,991				
Academic and Executive	17.5	6.6	17,307	10,815				
Agricultural worker	1.2	4.7	3,518	3,022				
General workers	1.0	0.8	4,056	3,014				
Clerk	24.6	13.2	7,187	4,850				
manufacturing worker	10.0	12.2	5,709	3,789				
Non-economic active workers	11.2	14.9	9,479	3,806				
Total	100.0	100.0	9,577	4,736				

2. Land Use

- In 2006, 39.70% of employed person are in agricultural sectors. However 40% of those do not own the land or own less than 10 rai (less than 6 hectors)
- Total 120 million rai of land is owned by private person, however 80% of land owners have more than 4 Rai

The Overview of Poverty in Thailand

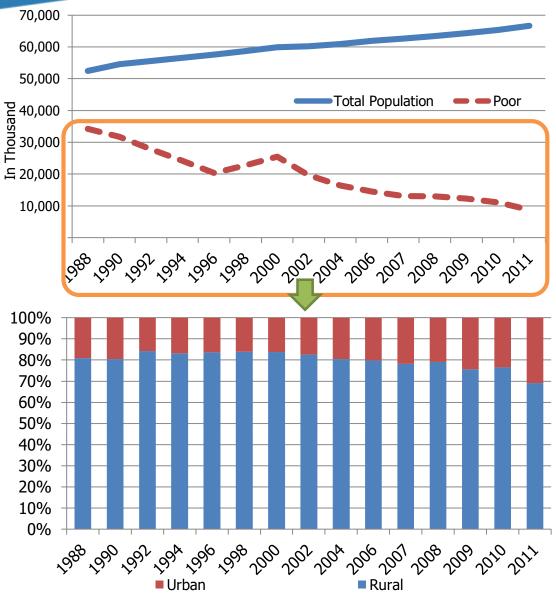

• The poverty in Thailand is multidimension. The characteristics of poverty can be shown in many forms including landless, wanderer, illegal occupations, students taking improper jobs, deception, indebtedness, homeless.

Source: Socio-Economic Survey (SES), The National Statistics Office complied by NESDB Urban

The Overview of Poverty in Thailand

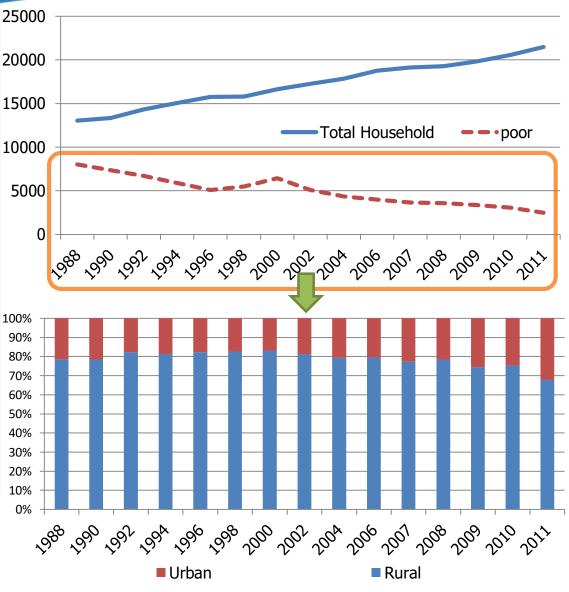

Thailand Population

- Thailand population trend is slightly increased. In 2011, number of Thai population reach was reached to 66.64 million, where 34% lives in urban area and 66% lives in rural area.
- In the past five years, the trend of the poor in Thailand continually decrease. It has fallen from 20.94% in 2007 to 13.15% in 2011
- Interestingly, since Asian Economic Crisis (1997) rural-poor tend to be decrease while urban-poor has increased.

The Overview of Poverty in Thailand

Thailand Household

 As of 2011, the Household Basic Minimum Needs (BMN) data disclosed that there estimated around 2.49 million households identified to have lived under poverty line.

Problem of the Poor in Thailand

Poor population can be divided into 2 categories

1. Non-Workforce Population

- Younger Age :
 - Unable to access to formal school system
 - Leaf school before appropriate age because of economic condition
- Senior Citizen

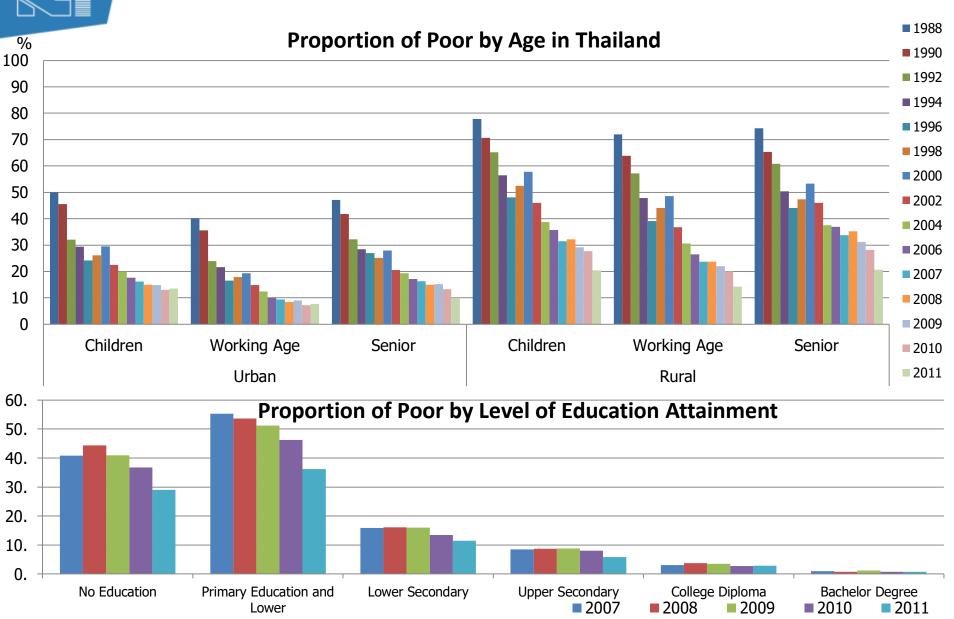

2. Workforce Population

- In 2011 the proposition of working poor is 12.07 % (4.7 million) from the total 38 million workers in the whole kingdom. The problematic structure toward working poor in Thailand are;
 - 1. **Population Structure turn to be Aging Society**: Dependency ratio will be decrease. SES data shows that proposition of poor household with senior citizen is 15.55 % while the proposition of poor household with no senior citizen is 9.25%
 - 2. **Large Informal Sector**: Most of workers in Thailand work in informal sector which do not receive any social benefit. In 2011, there are 14.95% working poor in informal sector.
 - 3. **Wage Mechanism in Private Sector**: In Q1-2013, There is 2.93 million workers with more than 10 years of experience receive only daily minimum wage.

Strategies fight against poverty

Target Groups

- The extremely poor
- The moderate poor
- The Vulnerable Poor

Key-Strategic Partners

Strategies fight against poverty

Strategies for the target group

Strategies for the strategic partners

Provide Basic Assistances (Education, Health services, Food, Housing, etc.) Provide Financial Assistances

(e.g. microfinancial scheme)

Provide Selfreliance programme Increase Social & Political Participation among the poor Advocate all partners to establish the national policy on poverty alleviation

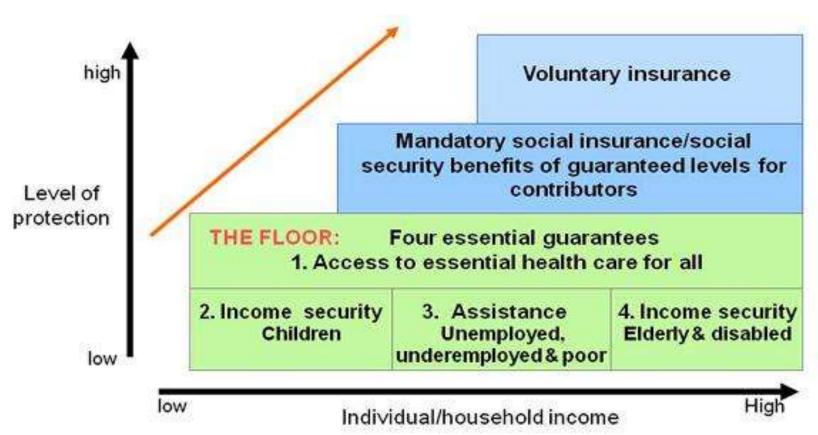

Strengthen and enhance the current policies on poverty alleviation

Establish
committee (as
tripartism)
comprising of
government,
private sector, and
civil society (NGOs,
people)

Establish central database to help monitoring the situation of poverty in rural-urban areas

Concept of SPs for the Poor in Thailand

Financial Terms

Micro-finance scheme

As a result of the financial crisis in 1997, the government has developed the first 'National Microfinance Plan'. It is the five-year plan (2009 - 2013). In principle, it is the mechanism that the Bank of Thailand uses for increase the access to financial services of the unserved and underserved groups. The formation of the microfinance scheme in Thailand is the combination between the operation of the formal banking systems and the financial services provided for the low income people. Presently, the microfinance scheme can be subdivided into three main categories including (i) formal and large microfinance institutions; (ii) semi-formal microfinance institutions; and (iii) self-help saving and credit groups (The Foundation for Development Cooperation, 2010).

Formal

Commercial Bank, Financial Company, BAAC, GSB, GHB, Exim Bank, Islamic Bank, SME Bank, Insurance Company, and Non-Bank financial Institution

Semi-Formal

Village and Urban Community Revolving Fund, Agriculture/ Saving/ Credit Union Cooperation, Register Saving for Production Group

Self-Help group

Saja Saving Group, Village Bank, NGOs MFIs, other financial intermediary organization

Credit Coverage

7.730 trillion Baht
USD 234 Billion

860 Billion Baht
USD 26 Billion

30 Billion Baht
USD 909
million

Village and Urban Revolving Fund (VRF)

This fund has been started since 2001 as one of the populism policy. It was introduced as Thailand Village and Urban Revolving Fund (VRF) program. The objective of this fund was to provide a million baht to every village and urban community in Thailand as working capital for locally-run rotating credit associations (Boonperm, Haughton, & Khandker, 2009). On other word, this fund helps the people in the rural communities accessing into financial resources.

Nowadays, the fund has been implemented for more than ten years. The beneficiaries of this fund are approximately 79,255 villages that cover 12.8 million members. The budget that had been generated is estimated 160 billion Baht (Kitjakosol, 2012).

National Saving Fund

In 2011, the government has enacted the 'National Saving Fund Act B.E.2554 (2011)'. This fund is managed and administrated by the National Saving Fund Office. The objective of the fund is to allow people without social welfare service such as people in the informal sector to save their income with the government and the benefit will be returned to them when their age at 60 years. This scheme will be available to interest persons in July 2012.

Insurance schemes article 40 of the social security act

The insurance schemes article 40 of the social security act is classified into 2 schemes including 100 Baht schemes and 150 Baht schemes. Both schemes are partial subsidized by the government; the 100 Baht scheme is subsidized for 30 Baht while 150 Baht scheme is 50 Baht. The insured person of both schemes receives different benefit. According to the Social Security Office (SSO)-the organization that undertakes this schemes, there is estimation around 1.84 million informal employed persons registered for the scheme.

Scheme and		Contribution	Benefits				
contribution			Events of injury or sickness	Invalidity benefit	The events of Death	Old-age benefit	
1 st scheme or 100 Baht schemes	•	Insured person contributes 70 Baht Government subsidizes 30 Baht	√	√	√	-	
2 nd scheme or 150 Baht schemes	•	Insured person contributes100 Baht Government subsidizes 50 Baht	√	✓	√	√	

Universal Pension Schemes

Currently, the government has announced to provide progressive the old age allowance for the elderly, above the previous flat rate of THB500. Under the income support policy, the elderly aged between 60 and 69 years old will receive a monthly allowance of 600 Baht. Those aged between 70 and 79 years old will receive THB700. The elderly aged between 80 and 89 years old will receive 800 Baht. The elderly aged 90 years old or more receive a monthly allowance 1, 000 Baht Government Relations (The Public Department, 2012).

Universal Health Care Coverage

The scheme has consolidated all of the existing health insurance schemes belonging to the Ministry of Public Health (MOPH), such as the Health Welfare Program for the Low Income and Disadvantaged (HWPLID) and the Health Card Scheme (the 500 Baht Health Card for Families). The UC's goal is to provide full health care coverage for all Thai citizens who do not belong to the Social Security Health Insurance Scheme (SSO) or the Civil Servants' Medical Benefit Scheme (CSMBS). Eligible persons have to register with the networks in order to obtain a free insurance card and pay a flat rate copayment of 30 Baht for each out-patient visit or hospital admission but the co-payment was exempted in 2006. The UC is financed from government revenue.

Suggested Policy to Reduce Poverty

- Increase employment iob and opportunity
- for agricultural Land reform development and develop the irrigation system
- •Stabilize agricultural product price
- Enhance creative economy, which is environmentally- friend and distribute positive profit to society

Strengthen community

Enhance sustainable economy

Reform

government's

management

• Provide social welfare, in which respond to the community demand.

- Equally provide social services for the poor and the advantages.
 - Build the social protection floor for all Thais.
 - Provide an opportunity for government, local administration and civil to manage social welfare system.

Increase social protection system for the poor and the advantages

- Define target group and develop database at local leve
- Increase the accessibility into social justice system.
- Reducing the poverty and social disparity by using mechanism, comprising of government, private sector, community and local authority
- Enhance monitoring and evaluation system from community level to national level.

Reform the revenue system

- Increase the direct tax
- Enhance the benefit and reduction for the tax grassroots and SMEs
- Initiate environment law
- Establish the database and develop the mechanism to monitor the informal sector
- Manage budget in conform to the demand of targeted group.
