## Impacts

The following trends are observed in social and economic conditions as a result of increased longevity. It includes:

- Reduced tax revenue;
- Significant increase in costs of social insurance and social welfare scheme
- Increase in the number of ineligible recipients that receive pensions and allowances from the Social Insurance Fund will require the Government to increase financial allocation.
- The increasing proportion of older people in the population will require greater social services than are currently offered.
- There is a growing need for health care system to shift its focus from overly focused pediatric to gerontology

## Challenges

- Weak system of the integrated long-term care systems and services for the elderly
- Insufficient funding and weak integrated funding system,
- Limited and less accessible services for the elderly
- Lack of multi-sectoral stakeholder collaboration and coordination
